DETAILED ACTION

Claim Rejections - 35 USC § 112

Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 4, line 2, there is no antecedent for “internal operating steps”. Also, it is not understood what the “internal operating steps” have to do with the “two phase internal voltage generator” of claim 3. Thus, this claim lacks connection or cooperation to claim the recited circuit. Further, it is improper for a method claim to depend from an apparatus claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-6 and 8-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Min (USPN 5,072,134).

With respect to claims 1-6, Min discloses, in Figs. 2 and 3, a circuit comprising: “a first phase internal voltage generator (10)”; and “a second phase internal generator (20)” having “a

voltage pump” (3)”, “an input gate voltage generator (7’, see Fig. 4)” and “a power output circuit (M9)”, all connected and operating similarly as recited by Applicant.

With respect to claims 8-10, clearly the above circuit to Min will provide the recited method.

Claims 1 and 7 are rejected under 35 U.S.C. 102(e) as being anticipated by Yabe (USPN 6,661,279). Yabe discloses, in Fig. 5, “a first phase internal voltage generator (50)” having “a comparator (61)”, “a power transistor (55)”, “a first resistor (57)” and “a second resistor (58)”; and “a second phase internal generator (20)” having “a voltage pump” (51)”, all connected and operating similarly as recited by Applicant.

Claim 11 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
